

# The World's #1 vCloud® Director Alternative

**Haven't heard of us until now? VMware has, and they wish they hadn't.**

In the last five years VMware have discontinued Lab Manager, and now vCloud Director (vCD). Do you really want to take another chance with VMware and go with vRealize Automation (vRA)? Embotics® vCommander® is a ten-year mature product that you can trust from now into the future.

What Makes Embotics® vCommander® the Best Alternative		vCommander	VMware vRA
<b>FAST</b>	Fast to deploy. You won't need a professional service engagement to get the product working. And you can quickly and seamlessly overlay on your existing VMware environment.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<b>EASY</b>	Ease of use doesn't stop with deployment. It extends all the way from configuration to the end consumer, with an intuitive user interface that makes sense right out of the box.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<b>FEATURE BREADTH</b>	A fully featured purpose built platform that provides provisioning automation, self-service orchestration, cost visibility, resource optimization, and more.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<b>PLATFORM NEUTRAL</b>	Avoid vendor lock-in. Retain your freedom of choice to manage "any hypervisor, any cloud" in your data center and externally — from a single console.	<input checked="" type="checkbox"/>	<input type="checkbox"/>

# Embotics vCommander Cloud Management Software

## Time to Value and Ease of Use

A fully multi-tenant solution, with proven deployments in large enterprise and service provider environments, vCommander seamlessly overlays across your existing VMware environment, providing immediate value in your existing brownfield environments. Purpose-built on a single code base, with integrated capabilities including cost visibility, rightsizing and resource optimization, and cloud governance. Why buy three products when you can buy one?

## Rich Self-Service Experience

Enable personalized self-service IT for end consumers through easily customizable service catalogs, and optionally delegate commands like power controls, console access, snapshots or any other actions.

## Provisioning Automation and Application Deployment

Built-in orchestration to automate approvals, provisioning, decommissioning and custom actions to reduce provisioning time, eliminate sprawl, and manage the lifecycle of virtual assets.

## Intelligent Resource Optimization and Cloud Management

Improve IT resource utilization and prevent sprawl across virtual and cloud environments through rightsizing, intelligent workload placement, and reclamation of resources.

## Chargeback and IT Costing

Provide visibility into virtual asset costs. vCommander enables IT cost reporting and supports chargeback or showback reporting based on an organization's policies. It also analyzes costs across multiple platforms.

## Flexible Workflows and Lifecycle Management

Easily customizable and extensible through a web-based user interface, it addresses your particular IT and business needs. Easily leverage any pre-existing scripts, or make use of vCommander's library of workflow building blocks.

## Virtual Lab Management and DevOps

Automate virtual labs, manage test and development environments, and enable DevOps processes while leveraging integrated core features including quotas, network fencing and VM sharing (LiveLink).

## Multi-Hypervisor and Multi-Cloud Management

From a platform-neutral, single console, vCommander analyzes, federates, manages and orchestrates across private, public and hybrid cloud environments.

## Who uses Embotics vCommander? Only the world's best.

# About Embotics

---

Embotics is the cloud automation company for IT organizations and service providers that need to improve provisioning or enable self-service capabilities. With a relentless focus on delivering a premier user experience and unmatched customer support, Embotics is the fastest and easiest way to automate provisioning across private/public/hybrid cloud infrastructures. Its flagship product, Embotics vCommander, is used by organizations including Nordstrom, NASA, Fanatics, Informatica and Charter Communications.
