

The World's #1 vRA Alternative

Haven't heard of us until now? VMware has, and they wish they hadn't.

VMware's vRealize Automation is complex, difficult to deploy, and of course expensive — not just to license, but also to own and operate. It's also in VMware's best interests to "lock in" users to their platform.

“

Embotics vCommander was our #1 Choice over VMware vRA/ vCAC... its ease of use is unmatched.

Cloud Services Architect,

What Makes Embotics® vCommander® the Best Alternative		vCommander	VMware vRA
FAST	Fast to deploy. You won't need to be on the phone with support or need engineers onsite to get the product working. All you need is 15 minutes and a virtual machine (VM).		
EASY	Ease of use doesn't stop with deployment. It extends all the way from configuration to the end consumer. With a user interface that makes sense right out of the box, you won't need to send anyone for training.		
AFFORDABLE	All the power, scalability and capability you need at a price that will easily compete with the other guy's support contract. Oh, and did we mention no hidden professional services costs?		
PLATFORM NEUTRAL	Avoid vendor lock-in. Retain your freedom of choice to manage your private, public and hybrid clouds, all from a single console.		

Embotics vCommander Cloud Management Software

Time to Value and Ease of Use

A fully multi-tenant solution, with proven deployments in large enterprise and service provider environments, vCommander seamlessly overlays across your existing VMware environment, providing immediate value in your existing brownfield environments. Purpose-built on a single code base, with integrated capabilities including cost visibility, rightsizing and resource optimization, and cloud governance.

Rich Self-Service Experience

Enable personalized self-service IT for end consumers through easily customizable service catalogs, and optionally delegate commands like power controls, console access, snapshots or any other actions.

Intelligent Resource Optimization and Cloud Governance

Improve IT resource utilization and optimize cost, through rightsizing, intelligent workload placement, and AWS Reserved Instance (RI) recommendations. Further enhance costing and cloud governance through power scheduling and AWS tag enforcement.

Provisioning Automation and Application Deployment

Frictionless support of self-service provisioning with IT policy based compliance, automates the end-to-end delivery and continuous management of infrastructure and application services.

Chargeback and IT Costing

Provide visibility into virtual asset costs. vCommander enables IT cost reporting and supports chargeback or show-back reporting based on an organization's policies. It also analyzes costs across multiple platforms.

Flexible Workflows and Lifecycle Management

Easily customizable and extensible through a web-based user interface, flexible pre & post provisioning workflows include in-guest execution making vCommander suitable for any and all automation needs. Easily leverage any pre-existing scripts, or make use of vCommander's library of workflow building blocks.

Virtual Lab Management and DevOps

Automate virtual labs, manage test and development environments, and enable DevOps processes while leveraging integrated core features including quotas, network fencing, VM sharing (LiveLink) and a fully featured REST API.

Multi-Hypervisor and Multi-Cloud Management

From a platform-neutral, single console, vCommander analyzes, federates, manages and orchestrates across private, public and hybrid cloud environments, including VMware vSphere, Microsoft® Hyper-V, Amazon Web Services (AWS) and Microsoft® Azure.

Who uses Embotics vCommander? Only the world's best.

NORDSTRC

About Embotics

Embotics is the cloud automation company for IT organizations and service providers that need to improve provisioning or enable self-service capabilities. With a relentless focus on delivering a premier user experience and unmatched customer support, Embotics is the fastest and easiest way to automate provisioning across private/public/hybrid cloud infrastructures. Its flagship product, Embotics vCommander, is used by organizations including Nordstrom, NASA, Fanatics, Informatica and Charter Communications.
